

THE IMPACT OF PEGASUS

by Shannon Gaitz on April 29, 2019 in Sponsored Content

Dateline Imports P/L has a new import in its mix, so you can welcome the Pegasus range of combs to Australia and New Zealand, as exclusively distributed through the company. Importantly, the tools are made from 100 per cent hard rubber and Flexinite Technology and offer seamless teeth and rounded edges.

The range includes five tail combs with various sized teeth and tail materials, four cutting and styling combs, three barbering combs, a basin comb and four moustache and beard combs. To cater to salons, the range offers three retail displays to appeal to various salon demographics, ranging from barbering, to general cutting and styling, as well as a rotating display.

The new-age technology in the tools is sensitive to changing temperatures, mimicking hair for flexible movement for less hair damage while brushing and combing. The brand's hero tail combs are a popular choice, with unmatched accuracy and a thin rubber, metal or plastic tail to section hair, for ultimate efficiency. The tools are ideal for creating volume and back combing, with gentle form and a variety of styles to cater to different hair types.

Pegasus' professional cutting combs show the brand's commitment to the professional sector, with a focus on cut and style. The precision tools provide an accurate finish and each tool is uniquely crafted for barbers and hairdressers to thrive with. Smooth hair, hair health and flexible form are the many positive attributes provided by this tool.

The combs with handles are specifically made for unruly hair, with a sturdy handle and well spaced teeth to work through unmanageable hair with a firm grip. The combs even out the temperature of the hair, with Flexinite technology to keep strands intact and prevent fly-aways.

The specialised barbering combs pay special attention in the realm of men's care, with a variety of designs that can be used to style, trim and cut men's hair, as well as style and brush moustaches and beards. Each comb is designed ergonomically to easily move through fine or thick moustache hair.

Pegasus is as magical as its mystical title suggests, with tools that offer zero damage, enhanced heat styling and smoother results all with must-have Flexinite technology. Get these tools in hand and never look back with this specialised new brand from Dateline Imports P/L.
